EDUCATION

○ BACHELOR IN COMPUTER
SCIENCE ENGINEERING
2024 - 2028 (ongoing)
Institut Universitaire de la Côte
(IUC)

○ GCE A LEVEL
2022 - 2024
St Thomas Comprehensive High
School

○ GCE O LEVEL
2019 - 2022
St Thomas Comprehensive High
School

SKILLS & INTERESTS

- Programming: C, Python, Visual Basic
- Web Development: HTML, CSS, JavaScript, TypeScript, TailwindCSS
- Frameworks: React, Django, FastAPI
- Cybersecurity: Basics (Ethical Hacking, Kali Linux)
- Cloud Platforms (AWS, GCP, Supabase)
- Design: Adobe Illustrator, Blender, Canva (Beginner)
- Soft Skills: Adaptability, Leadership, Communication, Strategic Thinking, Self-learning, Teamwork, Creativity
- Interests: Tech & Startups, Music & Creative Expression, Personal Development

LANGUAGES

- French: Fluent
- English: Fluent

PROFILE

Product-oriented Computer Science Engineering student with a strong track record of building impactful digital products across high impact platforms. Experienced in leading cross-functional teams, defining MVP roadmaps, and managing the full product lifecycle from architecture design to production deployment.

Passionate about solving real-world problems through scalable, user-centric software, leveraging modern tech stacks and cloud services to deliver high-performance solutions.

PROJECTS & EXPERIENCES

○ AgriGuard - Co-founder & Tech/Product Lead

- Led the full-stack development of an SMS-based climate alert system, empowering over 30 smallholder farmers with critical insights and aiming to reduce crop losses by 30% through improved planting and risk-management decisions.
- Architected a scalable AgriTech platform delivering hyper-local, crop-specific recommendations, leveraging FastAPI (Python) for data analysis, integrating cloud services for robust data processing, and designing RESTful APIs.
- Developed a data-driven engine to analyze complex weather patterns, utilizing Supabase and PostgreSQL for efficient data storage and retrieval.

○ CampusSphere - Founder & Frontend Developer

- Founded and spearheaded the development of CampusSphere, an all-in-one student platform centralizing academic resources, collaboration tools, and AI-powered features, successfully targeting a 40% increase in student engagement.
- Defined the Minimum Viable Product (MVP) roadmap and feature architecture, applying Agile methodologies (Scrum/Kanban) to guide iterative development cycles.
- Designed and implemented the user experience (UX) and product positioning strategy, developing the frontend with React.js and TypeScript while integrating Git for robust version control.

ACHIEVEMENTS & COMPETITIONS

- Winner — AWS Santa Challenge 2025
- Winner — Hult Prize OnCampus at IUC — AgriGuard
